

Course Number: 712-715

Course Title: Computer Applications

Classroom: LB6

Teacher: Ms. Ma. Elena Montes

mechavez@ats.edu.mx

Grade Level: 9th

Credits: 0.5 Credits

School Year: 2026-2027

Course Description:

Computer Applications is a hands-on course designed to strengthen digital literacy, creativity, problem-solving, and computational thinking skills.

Throughout the course, students will use a variety of digital tools and platforms while developing skills in Google Workspace, file and cloud management, image editing, multimedia creation, web development, introductory programming, 3D design, and video editing.

Students will also explore responsible and effective use of the Internet and emerging technologies, including artificial intelligence, with emphasis on digital citizenship, privacy, academic integrity, and critical evaluation of information. Students will gain experience selecting appropriate digital tools to solve problems, communicate ideas, and create original projects.

Materials:

Each student is required to bring earphones.

Grading Criteria

Quarter Grading

Formative 60%

Summative 40%

Pass or Fail:

Students will pass or fail the class based on the final grade. According to the current SEP policy reflected in this syllabus, a final grade of 59.5% or above is considered passing.

Classroom Rules and Procedures:

1. The teacher reserves the right to choose your seat for the benefit of the group.
2. You must be seated and ready to start ON TIME as the second entrance bell rings. You have a 5 minute tolerance for coming to class before it is considered TARDY.
3. The number of absences permitted for each semester before credit is lost is listed below:
 - 7 total absences
 - 3 tardies = one unexcused absence
 - More than 10 minutes late to class without authorization equals an absence
4. You are expected to complete work within the time established by each assignment. Work submitted 1 day late will receive a maximum grade of 70%. Work submitted 2 days late will receive a maximum grade of 60%.
5. If you are absent, it is your responsibility to check Google Classroom and complete the assigned work.
6. You may leave the classroom ONLY with teacher permission.
7. Eating, drinking, or chewing gum in class is not permitted at any time.
8. Cheating, plagiarism, and unauthorized use of AI tools will result in a ZERO for the assignment in question. AI tools may only be used when explicitly permitted by the teacher. The teacher is the final arbiter in deciding whether academic dishonesty has occurred.
9. Cell phones and personal electronic devices are not permitted during class unless specifically authorized for an activity. Failure to follow this policy may result in the device being confiscated at teacher discretion.
10. In Computer Applications class, you will use the classroom computers. You may use your laptop only if there is a problem with your assigned computer and no other computer is available.
11. You have the right to receive instruction in the best possible atmosphere. Any behavior that interferes with this learning environment is inappropriate.

Course Content

Unit 1 - Google Workspace and Digital Productivity

Unit 2 - File Management and Cloud Organization

Unit 3 - Introduction to Programming

Unit 4 - Digital Image Editing (GIMP)

Unit 5 - Digital Animation and Multimedia

Unit 6 - Internet, Digital Citizenship and AI Literacy

Unit 7 - Web Design and Development

Unit 8 - Introduction to 3D Design and CAD

Unit 9 - Interactive Programming and App Development

Unit 10 - Video Editing (DaVinci Resolve)
